## Alberta honda express oil change hours

When it comes to your Honda car, van, or SUV, aside from usual visits to the gas station, there's very little it needs to reliably take you from Point A to Point B everyday. All that your Civic, Fit, Accord, CR-V, or Odyssey needs to keep running happy is regularly scheduled maintenance as outlined in your owner's manual. An oil change, new air filter, tire rotation, and inspection are typically all that's required of your bi-annual visit to our Honda dealership in Edmonton. And we make it as convenient as possible with our Lube and Tire Centre. Drive-thru service, no appointment necessary Open Monday to Friday, 7:30am to 4:00pm and 8:00am to 4:00pm on Saturdays, our Honda drive-thru Tire and Lube Centre is set up to provide quick warranty maintenance and oil changes on all Honda vehicles. But if you'd prefer to make an appointment, call our service team toll-free at 1-866-463-7885. We leave the 8:30am to 3:30pm timeslot open to advance appointments, though they tend to go quickly during peak seasons so don't delay! Please note: Tire change appointments with tires stored in Wheaton Honda's tire storage facility require a 72 hour notice prior to appointment. See Maintenance Schedules The Honda West Service team offers the best in automotive service to our customers and their Hondas. We maintain and repair close to 15,000 Hondas a year. Our state-of-the-art diagnostic and repair equipment allows our highly experienced and skilled factory-trained technicians to deliver efficient, top-quality maintenance and repairs. Ensure your Honda is functioning at its best with outstanding service from Honda West Calgary. Honda West only employs Honda Certified Technicians that are specialists when it comes to your Honda vehicle. Honda West uses Honda Genuine Parts that are designed specifically for your vehicle. Book A Service Brakes are one thing you should never be unsure about when it comes to your vehicle. If you notice your breaks fading or hear noises coming from them, the time to act is now! We are dedicated to making sure your brakes are fixed to the highest standard by a highly trained technician. Learn More When the seasons change as quickly and violently as they can in Calgary, it's vitally important to make sure your vehicle has the proper tires. Safety is one of our highest priorities, so let us make sure your vehicle has the proper "winter boots" when the weather turns nasty and the right summer tires to optimize your car's performance. Learn More If your vehicle has a cracked or chipped windshield Honda West offers in-house glass replacement and chip repair. Chips and cracks can create difficulty seeing the road in harsh lighting conditions. In the event of a crash, your windshield helps reduce impact, keeps passengers in the vehicle, helps your airbags deploy properly, and helps increase and maintain the structural integrity of the vehicle. Don't get left in the cold with a dead battery. If your vehicle's battery is due for service or replacement, we can offer the best prices on new batteries to ensure your vehicle remains in peak form, no matter the weather. Learn More Frequent oil changes ensure that your car's engine is maintained and well lubricated. Oil changes improves gas mileage and increase the lifespan of your vehicle. Our service technicians will ensure that your engine is running efficiently by removing engine wear debris, dirt and sludge. Manufacturer recommended parts are an important part of maintaining your vehicle's optimum performance. We offer the same high-quality parts and accessories for your vehicle and we keep a large inventory in stock at all times. Shop Parts With the knowledge that customers have several choices for vehicle repair, it is important for Honda West to strive to earn your business, rather than expect it simply because you drive a Honda. Our wide array of auto maintenance and repair services and expert service advisors are here to make sure your experience exceeds expectations. We employ the latest diagnostic equipment to solve a multitude of vehicle repair issues, and we always provide a quote before beginning any repair work. Automotive repair service centres are not created equal. Depending on the auto shop you choose, you may get aftermarket parts installed that may not meet the specific requirements of your vehicle's make and model. By choosing to have your vehicle serviced at Honda West, you can be assured that you're getting only authentic original equipment manufacturer (OEM) parts. This ensures that you get the same parts that were provided with the vehicle when it was built, the parts your vehicle was designed for. These OEM parts ensure that your car runs as expected, and they may even help the resale value of your vehicle. Aftermarket parts are rarely tailored toward your specific vehicle, and this practice can cause noticeable differences in vehicle performance. By taking your Honda to Honda West, your vehicle is safeguarded and you are assured that it's running in peak condition all year round. With the knowledge that customers have several choices for vehicle repair, it is important for Honda West to strive to earn your business, rather than expect it simply because you drive a Honda. By taking your Honda to Honda West, your vehicle is safeguarded and you are assured that it's running in peak condition all year round. Come in today to find the best offers on certified Honda service. Regular oil and filter changes are the single best thing you can do to keep your vehicle running smoothly for many years. By regularly changing your own oil, you save money as you extend your car's life by thousands of miles. Oil changes are something any DIYer can do. Once you have all the equipment on hand, you can change the oil in most cars in about 20 minutes.Before You Start Before you buy the oil, check your owner's manual for the type and weight of oil that's recommended by the car manufacturer. It's especially important to follow the recommendation for oil viscosity. Late model cars can encounter performance issues, get the dreaded "Check Engine" warning and even sustain engine damage if the wrong oil is used. It's also important to only use oil filters recommended by the manufacturer.To prep, spread a plastic sheet on the ground and drive your car over it. This eliminates the risk of oil spills on your garage floor. Make sure the surface area is flat and that your vehicle is in park with the safety brake engaged. Once you're safely parked, jack up the car, place the jack stands and lower the car onto the stands. If you're on asphalt, you can place squares of plywood under the jack stands for support. You will need the following items:Rags Funnel Safety glasses Wrench set Latex gloves Drain pan Container for old oil Engine Oil Oil filterChange the Oil Place all your items in a box or on a tray so everything is handy. Before sliding the tray under the car, apply a small amount of new oil to the new filter's gasket.Run your engine for about five minutes to allow the oil to become less viscous and make it easier to drain. Wait another 5 to 10 minutes to allow the oil to cool slightly to prevent oil burns. Place the drain pan under the car and remove the drain plug from the oil pan to get the old oil flowing. After the oil pan has drained, wipe around the drain plug area and replace the plug by tightening it with an adjustable wrench. If your vehicle uses an oil drain plug gasket, exchange the old one for a new one before replacing the plug.Remove the cap from the oil filter at the top of the engine and unscrew the filter. The filter will have oil in it so be careful not to spill any when you take it off, and make sure the drain pan is in place. Empty oil from the filter into the drain pan. Remove any remnants of the filter's rubber seal on the engine. Wipe off any oil and put on the new filter.Add New Engine Oil Slowly add the new oil to your engine using a funnel. The oil cap is located at the top of your engine and typically has an oil can graphic. Use the dipstick to determine how much oil has been poured, making sure you don't put in too much oil, as the oil can overflow when heated. Replace the oil cap and tighten it.Let your car run for a few minutes to allow the oil to circulate and to give you a chance to check for leaks. Recheck the dipstick to make sure the oil is at the right level per your user manual. The final step is to dispose of the old oil and filter. Take them to an oil change facility that accepts old oil or a household waste recycling facility near you. MORE FROM QUESTIONSANSWERED.NET
